

# ROCKY INTERTIDAL DATABASE

Angie Southwold, Alaska Region GIS

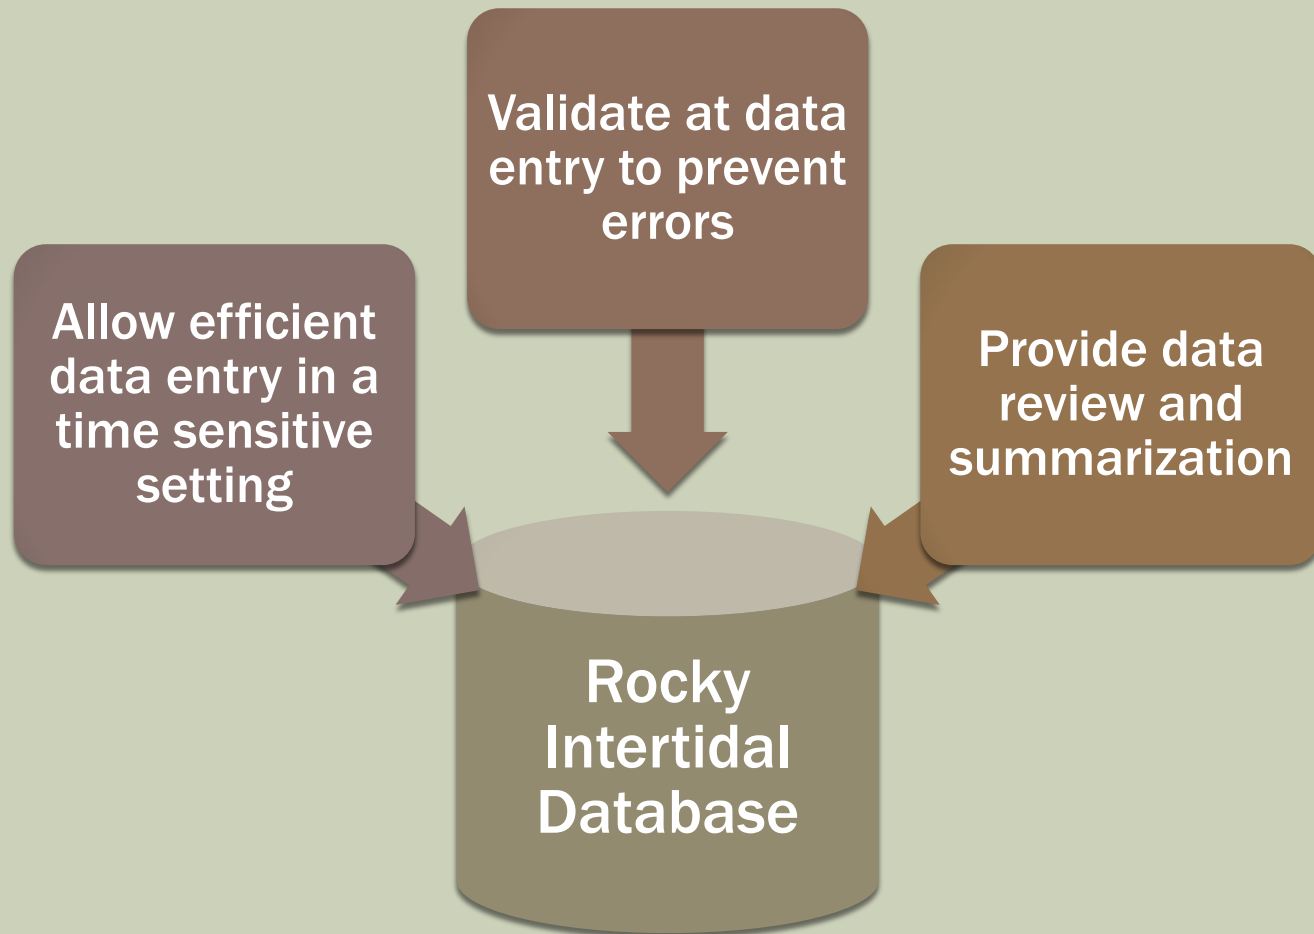

# PROJECT OVERVIEW

- Sample sites are only exposed at low tide
- Similar data are collected across multiple sites
- Many different types of data are collected at each site
  - Size distributions
  - Densities
  - Percent cover

# PROJECT NEEDS

# PROJECT HISTORY

Database development was contracted to an outside party prior to finalization of data collection procedures

This resulted in several changes that were made to the original design, ultimately decreasing the utility of the database

Now that the protocol is finalized and areas for improvement have been identified, the database can be made more efficient

# PROJECT IMPROVEMENTS

**Reporting**

**Data Entry**

**Database**
